Leading-Edge  
**Asset Management**

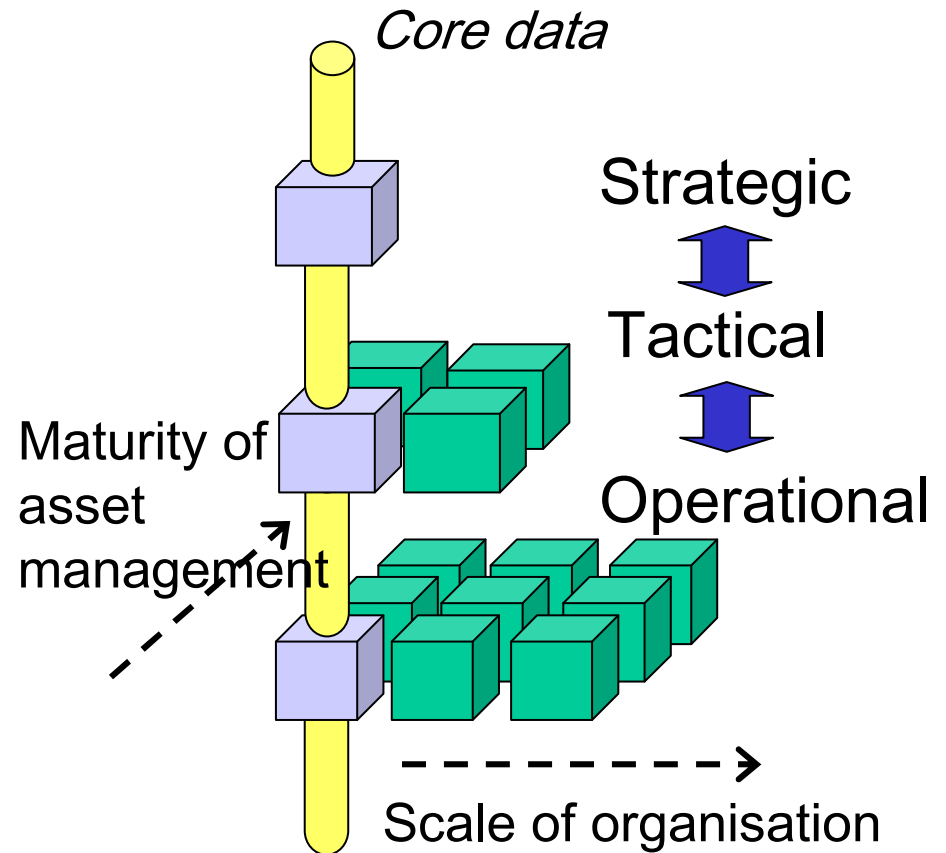

# 2nd IWA Leading-Edge Conference & Exhibition on **Strategic Asset Management**

**Outcomes the workshop on:  
'Topic 6 - Asset Data and Information Systems'**

LESAM 2007 – Lisbon 17-19 October 2007

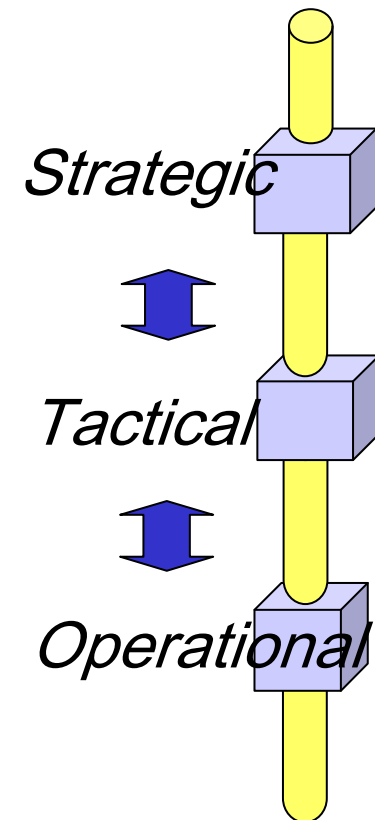

# Asset Data and Information Systems

- The quantity and quality of data and information varies across utilities and companies but we all need to make decisions
- The level of system integration is also variable

# Main gaps

- No standard protocols – but how do you get agreement?
- Integration at all levels in the organisation with feedback
- International databases - extent
- What data?
  - Financial
  - Operational
  - Asset
  - People capability

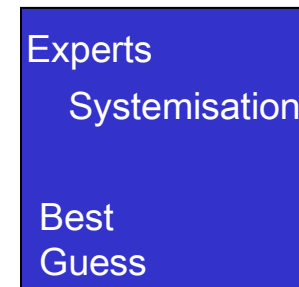

# Proposed solutions

- What data do we require?
- Develop the templates
- What is the cost? (benefit : cost)
- Understand what decisions can be made with the data you have
- WERF project 00 cts 7 – Generic architecture for information for a utility
- Go to Norway
  - geminiva – standard data protocols
